ILLNESS TOMORROW**

Immunaeon

IT'S NOT SCIENCE FICTION. IT'S JUST SCIENCE.

Our immune systems are built with specialized cells that defend our bodies from viruses, infections, and cancer.

But as we age, our immune system weakens. And if we get cancer, our immune system can be severely compromised.

But what if we could store our healthy immune systems before we get sick? At Immunaeon, we give you the opportunity to do exactly that.

HOW? IMMUNE STORAGE.

Scan this QR code to learn more about immunotherapy and our process.

INVEST IN YOUR OWN LIFE WITH IMMUNE CELL STORAGE.

Our safe and proven process allows us to isolate, analyze, and store your healthy immune cells.

HERE'S HOW IT WORKS:

1

CONSULTATION

We speak with you to see if you're a candidate for immune cell storage.

2

PHLEBOTOMY

We draw blood from you at your home or preferred medical establishment.

3

CELL ISOLATION

Our FDA-approved process isolates your healthy immune cells.

4

CRYOPRESERVATION

We contain and store your healthy cells—safely and securely—in liquid nitrogen.

5

ANALYSIS

We analyze your immune cell data and share it with you and your physician.

6

RECLAMATION

You receive a full report and the best resources for moving forward.
